19.	Information on award	:	
20.	Brief Description of the Assignment	:	<p>The "Suspected Adverse Drug Reaction" mobile app is designed to address the need for a user-friendly platform that allows individuals to report and track suspected adverse reactions to medications. By facilitating the collection of valuable data on adverse drug reactions, the app aims to support healthcare professionals and regulatory authorities in monitoring and analyzing potential risks associated with medications.</p> <p>The Objective for the "Suspected Adverse Drug Reaction" mobile app encompasses the following objectives:</p> <p>Provide a User-Friendly Platform: Develop an intuitive and easy-to-use interface that enables users to report suspected adverse drug reactions with minimal effort.</p>

		<p>Enable Efficient Reporting: Implement functionality that allows users to provide relevant details, including medication information, symptoms, and patient demographics, to ensure comprehensive and accurate reporting.</p> <p>Track Reported Reactions: Create a system that allows users to track the status of their reported adverse drug reactions, providing updates on their progress and outcomes.</p> <p>Contribute to Data Collection: Facilitate the collection of comprehensive and reliable data on adverse drug reactions, which can be utilized for research, analysis, and decision-making by healthcare professionals and regulatory authorities.</p> <p>Enhance Drug Safety Monitoring: Support early detection and monitoring of potential risks associated with medications, improving patient safety and overall drug surveillance efforts.</p> <p>Promote User Engagement and Awareness: Encourage user engagement through features such as notifications, educational resources, and feedback mechanisms to enhance awareness and understanding of medication safety.</p>
